

# Easy2Weigh...

## *The Vehicle Weighing Display*

### *Features ...*

WLVTA (Whole Life Vehicle Type Approvals) by the UK VCA.

Six languages KG or lbs display.

High resolution touch screen.

Two overload alarm set points.

PPCO packer plate cut off (refuse collection).

Anti tamper PIN protection.

Multiple mounting options.

RS232 serial printer port.

RS485 serial data port.

### *Applications ...*

Truck & Trailers.  
Waste recycling collection.  
Hook-loaders (ro ro).  
Sweepers.  
LCV light commercials.  
Agricultural.

### *Overview ...*

The E2 display has been developed to work with the Truck-Tech UK range of vehicle load sensors and loadcells.

The E2 installs neatly into spare DIN slots can be panel-mounted or attached on a vehicle dash.

The Easy2 uses touch screen display for vehicle weighing. The Easy2 read full colour LCD touch screen gives operators the power to monitor payloads, load distribution to assist maximise profits and avoid overloads.

Simple on-screen menus mean drivers can choose between Net, Gross, Percent, Collected, or Delivered weights.

It's packed with standa-screen customer identification, printing and storing weighing transactions as well as high security anti-tamper pin code protection and on-screen diagnostics.

It'salsocompatible with a range of accessory devices for maximum vehicle utilisation and payload efficiency. The touch screen calibration makes set-up straight forward and Easy2...!

## *Load Management System*

Precision shock resistant Easy2 fit sensors

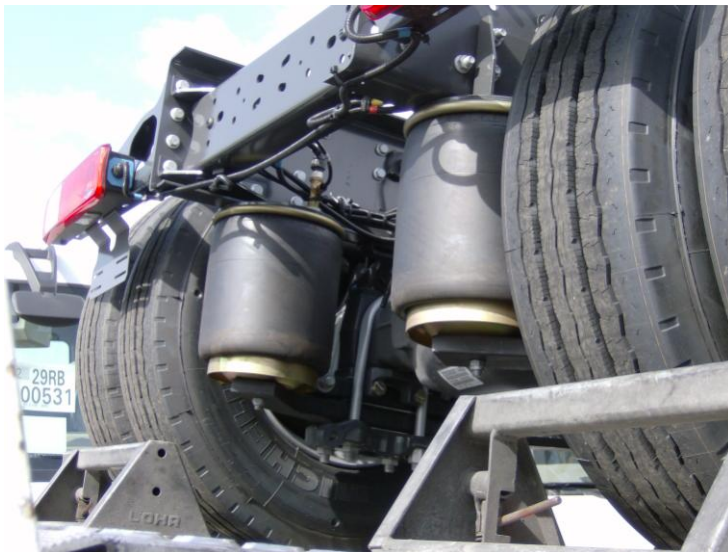

### *Mechanical suspensions...*

Quality high precision micro sensors that can be mounted anywhere on coil, single leaf or parabolic mechanical suspensions.

Installation of each sensor is done in minutes allowing vehicle down times kept to an absolute minimum, with no modification or fabrication required the Easy2 System can be installed on a standard service slot in any workshop with no specialist skills required. No high maintenance bespoke brackets levers rods or springs to install.

### *Easy2...*

Simply attach the sensors to the suspension and run the cable to the Eas2 display mounted in the vehicle DIN slot or specified cab location. Easy2 sensors can be also be used on mixed suspensions.

### *Air ride suspensions...*

Pressure transmitter sensors for air ride suspensions Shock and vibration resistant are used for load pressure monitoring specifically designed for extremities and harsh environments found within the automotive industry. Simply tee in to the airline in minutes using the Tee piece.
